

Electronic Devices Declaration

As written in S10 4.27 and wmc2024 local reg 1.11.11

No electronic devices with real or potential communication and or navigation capabilities are allowed either during quarantine or task flight.

Prohibited devices include, but are not limited to the following:

any GPS device

airband radios

smart watches or wearable tech

Bluetooth headphones

Each pilot is required to complete and sign this document to declare they **do not** have any non permitted equipment in their aircraft or in their planning kit. Any equipment that is non-removable (example glass panel cockpit displays) need to be listed below, with the mechanism used to disable its communication or navigation function.

a/c type	Registration	Comp number	Nation	Pilot name

Device description	Disabling mechanism	approval
<i>Example - Panel GPS</i>	<i>Antenna plug removed and port sealed and signed</i>	x

This sheet needs to be handed in completed at registration. Any listed items will be checked before the start of official practice. Unapproved equipment will attract a 100% penalty

I hereby certify that I have no equipment prohibited by local reg 1.11.1 other than those listed above
